DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-28 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 03/0664502 A2 who discloses a Fischer-Tropsch reactor connected to a magnetic separator for separating magnetic particles from a non-magnetic field, wherein the magnetic separator comprises a separation chamber having an interior wall, and exterior wall, a bottom portion and an elongate portion defined between the top and bottom portion; a electromagnet, superconducting or permanent magnet having a first pole and a second pole adjacent to the exterior wall of the separation chamber, wherein the first pole is substantially diametrically opposed to the second pole; a pump in communication with valved first and second inlet ports directed into the top portion of the separation chamber, wherein the first and second inlet ports are positioned adjacent to one of the first and second poles, wherein the first and second inlet ports transfers a mixture into the separation chamber; and a pump in fluid communication with valved underflow port in communication with the bottom portion of the separation chamber, wherein the underflow port receives the magnetic particles; and a valved overflow port in communication with the separation chamber, wherein the overflow port receives the non-magnetic fluid.
